

# Meeting Notes 1/25/2023

## **GitHub Updates:**

- Show branch in terminal
- Review processes with issues

## **Project Ideas:**

- Music social media
  - o Recommended artists/songs
  - o News on music/artists
  - o Artists social media
  - o Uses Spotify api to tie in playlists
  - o Can add your friends and see their music interests
  - o Can post what song you're listening to- by link or screenshot
- Grocery store deals scrapper
  - o Scrapes the deals each week from grocery stores
  - o Develops the most cost-efficient meals based on preferred serving size
  - o Can search for meals based on certain filters- dietary restrictions, serving size, meal type, etc
  - o Generates total prices for each meal on web app
    - Can check off ingredients you already have
  - o Pantry- put in ingredients you already have, calculates meal prices based on that

## **Golang Notes:**
